

Community-based TB and HIV integration

WORKBOOK

for the Good Practice Guide

Abbreviations

ACSM	Advocacy, communication, and social mobilisation
AIDS	Acquired immunodeficiency syndrome
ART	Antiretroviral therapy
CBO	Community-based organisation
CCM	Country coordinating mechanism
CPT	Co-trimoxazole preventive therapy
CSO	Civil society organisation
DFID	Department for International Development (UK)
DOT	Directly observed therapy
FDCs	Fixed-dose combination drugs
HCT	HIV counselling and testing
HIV	Human immunodeficiency virus
IEC	Information, education, and communication
IPT	Isoniazid preventive therapy
MDR-TB	Multidrug-resistant tuberculosis
MOU	Memorandum of understanding
NGOs	Non-governmental organisations
NTP	National tuberculosis control programme
PATH	Program for Appropriate Technology in Health
PWUDs	People who use drugs
STIs	Sexually transmitted infections
TB	Tuberculosis
UNAIDS	Joint United Nations Programme on HIV/AIDS
USAID	United States Agency for International Development
XDR-TB	Extensively drug-resistant tuberculosis

Authors: D'Arcy Richardson and Gitau Mburu

Project coordinator: Gitau Mburu

Copy editor: Kathryn Perry

Designer: progressiondesign.co.uk

Acknowledgments: Many of the tools in this workbook have been adapted from materials originally developed by PATH under contract to the US Agency for International Development to support workshops in advocacy, communication, and social mobilisation for TB control. The original materials were developed by a team at PATH including Svitlana Okromeshko, Hara Mihalea, Charlotte Colvin, D'Arcy Richardson, and numerous others working in PATH field offices. Trainings using these materials were co-sponsored by the Stop TB Partnership. The Working Group on ACSM at Country Level provided useful comments to strengthen the original materials.

The Cough-to-Cure Pathway used in this workbook was originally developed by the Academy for Educational Development in conjunction with the Stop TB Partnership, and has been updated here based on feedback from numerous PATH workshop participants over a four-year period.

The organisational assessment tool used in this workbook has been modified from the original International HIV/AIDS Alliance tool.

Funding source: Development of this document was funded by the International HIV/AIDS Alliance with additional support from PATH.

Good practice guide series: This workbook accompanies the International HIV/AIDS Alliance's Good Practice Guide on Community-based TB and HIV Integration, which is one in a series of good practice guides produced by the International HIV/AIDS Alliance in a range of technical areas, including: HIV prevention; Human rights and GIPA; family centred programming for children; Sexual and reproductive health and HIV integration; and HIV and drug use. To download Alliance publications, please visit www.aidsalliance.org/publication-search.aspx.

Disclaimers: All reasonable precautions have been taken by the International HIV/AIDS Alliance and PATH to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressly or implied. Every effort has been made to ensure the technical accuracy of this document while making it understandable for non-medical audiences. The material herein has been updated and is consistent with the latest World Health Organization (WHO)-approved international guidance on TB. However, users should be aware that national guidelines may differ from international guidance, and that TB control is changing rapidly, particularly with respect to new diagnostic tools and new drug regimens. Users of this guide should always consult national guidelines and policies as their first source of information on the technical aspects of TB control, and should keep abreast of new developments in TB control by subscribing to TB listservs (such as the Stop TB Partnership e-Forum at www.aidsportal.org/web/guest/stop-tb-eforum or the advocacy, communication and social mobilisation e-forum at <http://www.aidsportal.org/web/acsm>) or frequently checking the WHO Stop TB Department website at www.who.int/tb/en/.

Information contained in this publication may be freely reproduced, published, presented, or otherwise used for non-profit purposes without permission from the International HIV/AIDS Alliance and PATH. However the International HIV/AIDS Alliance and PATH request that they be cited as the source of the information in any use of this material.

Contents

- Section 1 How to use this workbook
- Section 2 How to know the TB situation in your country
- Section 3 How to choose activities appropriate for your organization
- Section 4 How to Create or strengthen appropriate partnerships
- Section 5 How to plan, implement and measure the success of your activities
- Section 6 How to fund your activities
